PARK USE SURVEY HIGHLIGHTS

PARK USE SURVEY HIGHLIGHTS

I would like to see nicer plantings and grass and a definition between the children's play area and the dog park.

Larger enclosed dog park AND better facilities for people. Dog park builds community for segment of the public - but having dogs make recreation field unusable for people is not acceptable. Dogs should be in a defined fenced area.

I would like to see leash laws enforced. I would like to see better fencing - keeping dogs away from the older-kids playground and basketball court, as well as off the Soccer Shots recreational field. I like that the enclosed dog park is far from the childrens' play areas and that dogs/owners have a separate entrance than families with children.
